

# The Middlebury Register.

VOLUME XIX.

MIDDLEBURY, VT., WEDNESDAY, SEPTEMBER 27, 1854.

NUMBER 23.

## THE MIDDLEBURY REGISTER,

OFFICE IN BREWSTER'S BLOCK ON MAIN-ST.

J. H. BARRETT & J. COBB,

Publishers and Proprietors.

### TERMS.

The Register will be sent one year, by mail, or delivered at the office, when payment is made *strictly in advance*, for—\$1.50. Delivered by carrier, paid *strictly in advance*, \$2.00.

No paper discontinued until arrangements are paid, unless at the option of the proprietors.

All communications must be *post-paid*.

V. B. Palmer is agent for this paper in Boston, New York, and Philadelphia.

### BOOK AND JOB PRINTING

Done in modern style and at short notice.

### Law of Newspapers.

Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscriptions.

If subscribers order the discontinuance of their papers, the publisher may continue to send them till all that is due is paid.

If subscribers neglect or refuse to take their papers, the editor to whom they are addressed are held responsible till they have settled their bills and ordered their papers discontinued.

If subscribers move to other places, without informing the publisher, and the paper is sent to the former direction, they are held responsible.

Subscribers have decided that refusing to take a paper from the office, or removing and leaving it uncollected, is prima facie evidence of intentional fraud.

A Postmaster neglecting to inform a publisher when his paper is not taken from the office, makes himself liable for the subscription price.

### 200 PER CENT ASSURED!

### A NEW DISCOVERY AND INVENTION.

Phelps' Ohio Combination Patent Bee Hive was awarded the first premium and diploma, at the Ohio State Fair, September 1st, over Kelsey's Dogue de Bordeaux, and a premium of \$100, also a diploma for the best Hive at the Indiana State Fair, and a premium at the New York State Fair, September, 1852, also at the Crystal Palace and numerous County Fairs. It is acknowledged by all practical bee keepers, that it is the most successful and easiest to keep, and that its merits are well adapted to large or small swarms, and likewise for a swarming, non-swarming, or dividing hive, and in fact it exceeds all others, every way. It is especially well suited for persons, lady and gentleman having a permanent residence, will procure it as soon as they learn its excellencies. We would say to those who never kept bees, that with this Hive they may be managed with perfect impunity, and in the case may be compelled to the operation of the hive, will be enabled to stand in contact with them. The advantages of this patent over others are as follows:

1. In perfect adaptation (in regard to size) to the annual wants of a colony of bees, all season long, by a large or small hive.

2. In being easily managed, for collecting honey or removing any portion of the old comb, as simple to any other, as the bees may be made to leave either the hive when desired before removing it from the hive-box.

3. In the best arrangement for observing the operations of the bees—the amount of honey in store, and the strength of the colony at all times without exposure to the bees.

4. The construction of the hive with the sliding board, so that it will always save the bees from the cold, and the bees will be safe, and may be put in any case, having a warm, airy, little, or even dining room, if you please, where your honey will not slip off without your personal observation.

5. It is acknowledged to afford the bees protection from the sun, and rain, and the heat of the sun enter the hive only through the aperture at which the bees enter, is the only means of access for the miller, and thus being three inches over the bottom the bees are not liable to have it during evening as it was not without your personal observation.

6. It is acknowledged to afford the bees protection from the sun, and rain, and the heat of the sun enter the hive only through the aperture at which the bees enter, is the only means of access for the miller, and thus being three inches over the bottom the bees are not liable to have it during evening as it was not without your personal observation.

7. It is also acknowledged by all who have fed bees in this way to be the most convenient and easiest that has been known, and the only one that can be fed with any degree of safety against robbers.

8. It is so well arranged for whiting bees successfully as it is well ventilated, and the boxes containing the bees being set in a row, keeping them in an even temperature during winter, and they consume much less honey than in any other hive.

9. The bee feeder by this improvement, can prolong the season by feeding your bees, keeps them making honey with a profit of 100 per cent.

To amateurs, bee keepers and all lovers of honey, there is no investment which offers such inducements and combines so many advantages as this. One of these hives with bees at its work has been now on exhibition at the Crystal Palace, and the public admiration and called forth the admiration of tens of thousands, and is acknowledged to be the most simple, cheap and perfect arrangement of the kind ever invented.

This hive has been thoroughly tried and tested by the author, and has given him two to five years, and this is the first introduction of this patent in this State.

H. N. Park, John Brundage, V. Alder, Henry Farny, W. Shields, Geo. Emde, James C. Smith, Wm. C. Smith, Wm. S. Smith, Saml. Bowes, Thos. Blanchard, W. Alder, A. Shewell, Jas. Wells.

The author has received the results of testing this hive, and the claims of all the Patents are published regularly in its column, as far as we are able to make it a perfect selection and Mechanic's Magazine, and is entitled to the admiration of tens of thousands, and called forth the admiration of tens of thousands, and is acknowledged to be the most simple, cheap and perfect arrangement of the kind ever invented.
